GENERAL REFERENCES

Pricelist Vantana 2020 season,
last updated June 2019

This price list supersedes all previous price lists that have been published. The prices are recommended retail prices ex works from Fockbek including statutory VAT. New prices will apply if the chassis manufacturers change their prices. If accessories and optional extras are fitted and installed, the payload will be reduced and the unladen weight, mass in running order and height of the vehicle will be increased. All mass and weight specifications comply with Commission Regulation (EU) 1230/2012, unless the brochure including technical data and price list specify otherwise. The weight of additional equipment is specified in our brochures or you can request this information from your dealer/salesperson. Weight measurements may vary by up to five percent due to the use of natural materials. All content is correct at the time of going to press. Design and equipment subject to change without notice; errors excepted.

Some of the models featured in the brochure have optional extras or decorations that are not part of the standard scope of delivery. Deviations from the pictured furnishings in terms of structure and colour are excepted provided they relate to the nature of the materials used and are consistent with standard commercial practice. The same applies to technical modifications to the vehicle provided the overall product quality remains the same or is improved and the intended purpose is not impaired.

The prices quoted are only valid within the scope of new series production. In some cases, it may not be possible to retrofit certain optional extras, or this may be associated with significant additional costs.

FOOTNOTES

1 Includes alternator 200 A.

2 The maximum technically permissible laden mass must not be exceeded under any circumstances.

3 The mass in running order may deviate by +/- 5% from the nominal value stated in Directive 2007/46/EC, Annex I, Paragraph 2.6, Letter b, or in Annex III, Part I, Section A or B, or in the CoC, or in ZB II. It consists of the empty vehicle weight including lubricant, on-board tools, repair kit, fuel (90%), extra battery, all ex-factory standard equipment and 75 kg driver allowance. It has been determined in accordance with Commission Regulation (EU) No 1230/2012, allowing for the drive-ready fresh water tank filling volume (cf. Fn. 5), a full hot water heater and a full 11 kg aluminium gas bottle.

4 The payload corresponds to the difference between the maximum technically permissible laden mass and the mass in running order. This value must take into account the weights of passengers, optional accessories and personal items. The payload capacity is reduced when optional extras and accessories are installed. Furthermore, the payload capacity is not only dependent on the mass in running order, the actual vehicle mass, the weight of the accessories and the maximum technically permissible laden mass, but also on the respective axle loads. A prerequisite for reaching the maximum vehicle payload capacity is the appropriate distribution of the load in relation to the axle load.

5 The trailer hitch is one of the optional extras. Please comply with the maximum permissible gross train weights.

6 The permissible braked towing capacity is 2,000 kg for a 120 hp engine. With a 140, 160 or 178 hp engine, this increases to 2,500 kg.

7 The maximum number of permitted people specified in each case is dependent on the weight and axle load. It may be reduced when optional extras and accessories are installed, meaning that individual seats cannot be used in favour of the payload capacity. If all the seats are to be used, this must be at the partial expense of the payload. The maximum technically permissible laden mass and the axle loads must not be exceeded.

8 The installation location of the TV bracket / pull-out mount can accommodate a television with a diagonal screen size of up to 22" (max. overall dimensions: 535 x 351 x 50 mm).

9 Not in conjunction with 120 hp engine.

10 Only in conjunction with 16" alloy rims.

11 Subject to subscription costs, please refer to the product description for more information about Hobby Connect. Availability varies according to country.

12 Only in conjunction with TRUMA Combi CP Plus LCD control panel.

13 This optional extra is only available in conjunction with the TFT control panel.

14 Battery-powered.

15 Includes: homologation / EU type-approval. COC / APPROVAL CERTIFICATE PART 11 AND GAS CERTIFICATE.
